RÉSUMÉ

Gavin N. Morgan

Software Developer · Technical Generalist · Agentic Systems Engineer

hello@gavmor.com ◆ (650) 787-6770 ◆ Mountain View, CA ◆ linkedin.com/in/gavmor ◆ github.com/gavmor

PROFESSIONAL SUMMARY

Versatile Software Developer and Technical Generalist with deep experience across SaaS development, DevOps, and continuous delivery. Excels in engineering leadership — project scoping and mentoring — with strong product-management instincts in road-mapping, UX research, and market validation. A dogmatic practitioner of agile planning and eXtreme Programming, dedicated to continuous learning, impactful solutions, and force-multiplier technologies that build high-performing teams and products.

EXPERIENCE

AI / Agentic Systems Engineer & Delivery Lead

2025 – Present

Artium — *client engagements: a financial services firm; a major academic medical center*

- Designed, architected, and shipped production software built on **semi-autonomous agentic loops (Claude Agent SDK)**: lifecycle-hook management, tool provisioning, and MCP integration.
- Built **human-in-the-loop pipelines** surfacing curated human feedback into agent context at decision-critical stages, improving decision quality.
- Stood up **statistical evaluation practice (Arize Phoenix, DeepEval)** — experiments against golden datasets proving whether context-engineering changes helped or hurt; continuous offline evals wired into **CI**.
- Delivered the full stack around the agents: **API services, ORM/database management, cloud container platform**.
- *Financial services:* agentic system classifying and deciding on financial products; automated research at high throughput, cutting **weeks to months** off operations time.
- *Medical research administration:* platform letting institutions **securely expose private research data to AI without public divulgence**, enabling first-time AI-assisted proposal evaluation and award decisions.
- **Led delivery:** facilitated planning, groomed the backlog with a product manager, and drove the **path to production** so proofs-of-concept got operationalized, not shelved.
- Managed IT/vendor relationships for **compute, cloud, and project-management resources**; owned documentation and compliance; maintained **DevOps tooling and reusable agent skills** accelerating colleagues' delivery.

Freelance Consultant

2022 – 2024

Various

- Advised and demoed **AI/ML operationalization & strategy**.
- Revitalized legacy codebase with test suites.
- Facilitated requirements gathering and design processes.

Co-Founder / CPO

2020 – 2022

Druthers.app — *real-time peer-to-peer multiplayer group decision-making*

- Designed and implemented **responsive mobile UI**.
- Co-implemented **CRDT over WebRTC networked persistence**.
- Validated market through customer interviews and testing.

Staff Software Engineer

Aug 2019 – Mar 2020

VMware, Inc. *(acq. Pivotal Software)*

- Worked on the PKS (now Tanzu Kubernetes Grid) **Core & Release Engineering teams**.
- Maintained suites of **automated testing, validation, and delivery pipelines**.
- Added features to **PaaS control plane application**.

Senior Software Engineer

Mar 2017 – Sep 2018

Euclid Analytics

- Contributed to **infrastructure & expansion of spatial analytics platform**.
- Implemented **full-stack data collection features** from captive portals through to databases.

Senior Partner

2016 – 2017

Independent Contracting — *small software contracting agency*

- Gathered requirements and facilitated design process, producing **comprehensive product roadmaps**.
- Led a cross-disciplinary team of five to **deliver client projects**.

Senior Software Engineer

Oct 2012 – Nov 2016

Pivotal Labs

- Pair-programmed with clients to ship working software and teach modern languages and frameworks.

SKILLS

SOFTWARE DEVELOPMENT

SaaS Application Development, DevOps, eXtreme Programming, Pair Programming, Test-Driven Development, Release Engineering, Continuous Integration & Delivery

ENGINEERING LEADERSHIP

Project Scoping, Mentoring, Recruiting, Interviewing, Hiring, Hackathon & Volunteer Coordinating

PRODUCT MANAGEMENT

Road-mapping, Design Thinking, Kanban & Agile Project Management, UX Research, Product Validation, Market & Customer Validation

COMMUNICATION

Writing, Group Facilitation, Interpersonal Conflict Resolution, Pitching, Business Modeling, Lateral Thinking, Afro-Caribbean Jazz Saxophone

TECHNOLOGIES

AI Claude Agent SDK · MCP · Arize Phoenix · DeepEval · Ollama · llama-index · qdrant

LANGUAGES TypeScript · Ruby · Bash · Python · SQL · Golang · Scala · Java · Node · CSS / HTML

INFRA Docker · Kubernetes · Terraform · BOSH

CI / CD Concourse · GoCD · Jenkins · CircleCI

FRONTEND Vite · React · Preact · bun · Babel · Webpack · d3 · Angular · Backbone · Figma

BACKEND Rails · Sinatra · Flask · Spring

PAAS / CLOUD Cloudflare · GCP · AWS · Firebase · Cloud Foundry · VMware Tanzu

VENTURES

Druthers.app (2020)
Co-founded real-time peer-to-peer multiplayer group decision-making SaaS.

BitRegister (2017)
Cashless touchscreen POS register with blockchain integration.

FirstClass CI (2016)
Automated multi-tenant provisioning for Concourse CI/CD-as-a-service.

Concrn.org (2015)
Real-time dashboard dispatching mental-health crisis care-workers.

Kindici (2010)
App for staging crowdfunded events.

EDUCATION

University of California, Santa Cruz, CA ◆ Foothill College, Los Altos, CA

PROFESSIONAL PHILOSOPHY

Impact — solving real problems beyond software for software's sake.

Leverage — force multipliers that dramatically increase productivity.

Collaboration — pair programming and consensus building to supercharge teams.

Mastery — continuous pursuit of deep understanding and technical excellence.

Innovation — curiosity and experimentation with new technologies.

Rapid Prototyping — functional spikes to validate ideas and explore tech.

Design-Oriented Engineering — bridging design vision and technical implementation.
